Why India Dairy Expo

The expo provides an essential platform for industry professionals to connect, discover the latest advancements in poultry management and dairy Management health, and nutrition, and explore new business opportunities. Be part of this landmark event and contribute to making it a grand success!

The **India poultry and Dairy market** has experienced significant growth in recent years, with its size reaching a value of USD 30.46 billion in 2023. This growth can be attributed to various factors such as increasing protein consumption, rising disposable incomes, and the growing popularity of poultry products and dairy products among consumers. The industry has also benefited from advancements in poultry and dairy farming techniques, improved breeding practices, and government support for infrastructure development.

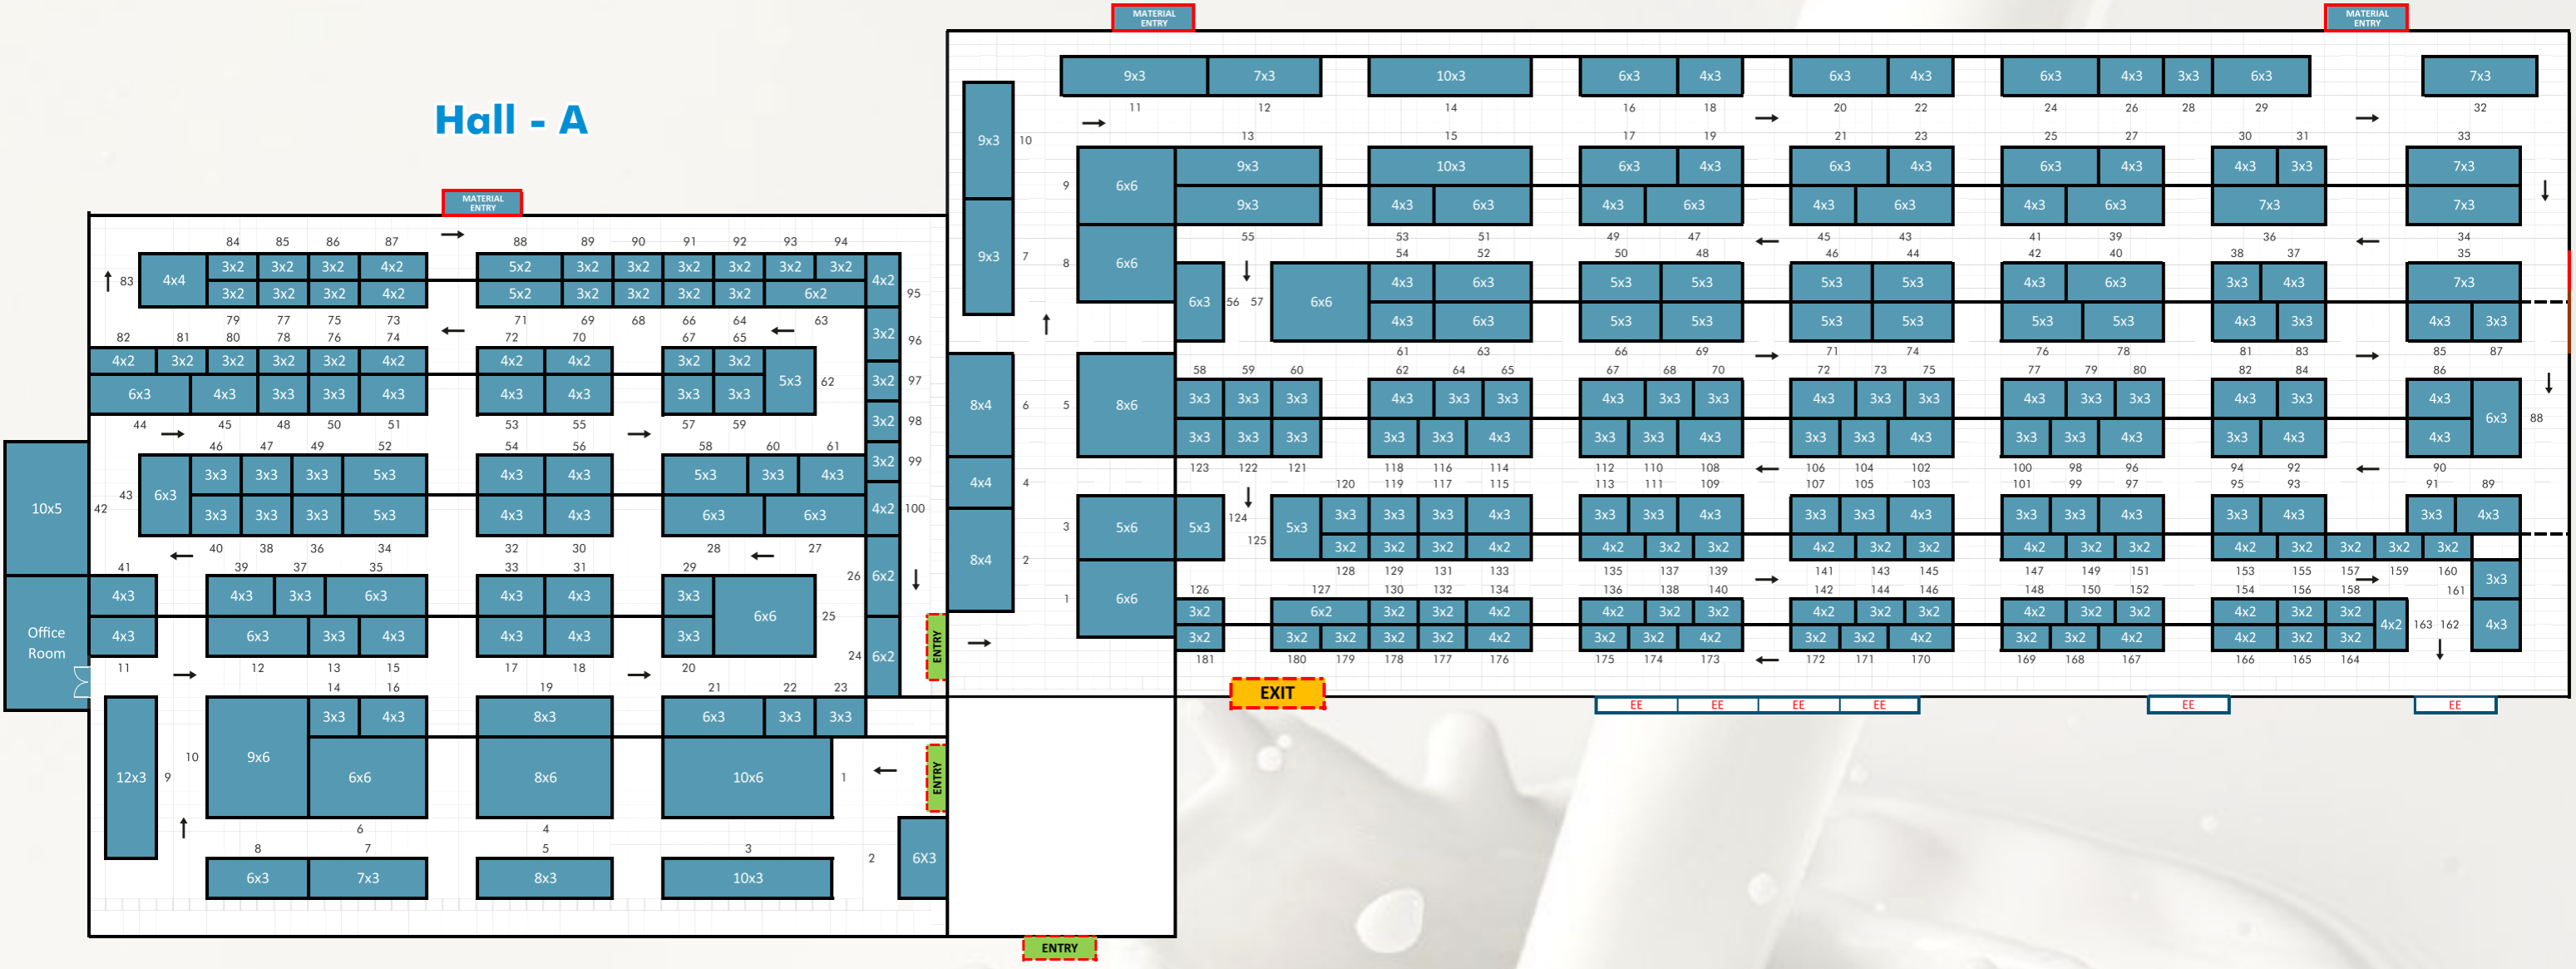

Numerous studies have confirmed that exhibitions are a unique marketing tool and an excellent medium for business communications. According to a recent research, 90% of business leaders make purchasing decisions of some kind during exhibitions and consider it a best place to get information about their field. Around 80% of exhibitors consider exhibitions to be the tool with the highest rate of return on investment. Exhibitions are unique in their ability to familiarise professionals with the full breadth of progress in a field so quickly, allow them to test new products personally and get experts' advice.

PLD INDIA DAIRY EXPO an international standard exhibition for the poultry and dairy industry has been formed by studying the needs and objectives of the above facts and has been playing a important role in the modernisation of the economy of Poultry and dairy Industry in India. **PLD INDIA DAIRY EXPO** has continued its efforts and reaches every year to bring new businesses in technologies, poultry and dairy nutrition and animal health from all around the work to India.

India Dairy India will work to keep abreast the latest developments and practice in the poultry & dairy management, poultry & dairy health & nutrition, poultry & dairy breeding and new techniques in feed manufacturing and poultry & dairy production.

Dairy Expo 2025

Technological innovations are playing a crucial role in transforming the dairy industry. This includes advancements in dairy farm management, milk processing, packaging, and supply chain logistics. Technologies like automation, Internet of Things (IoT), and artificial intelligence (AI) are being employed to enhance efficiency, improve product quality, and ensure safety. These technologies also aid in better farm management practices, allowing for higher productivity and sustainability.

Additionally, the adoption of cold chain technologies ensures that dairy products retain their freshness and nutritional value during transportation and storage. There is a significant shift towards value-added dairy products like cheese, yogurt, flavored milk, and probiotic drinks. These products offer greater margins and cater to the evolving consumer preferences for health, convenience, and variety. The demand for these products is being driven by increasing health awareness, the rising middle class, and changing dietary habits.

Dairy companies are investing in new product development and marketing strategies to capture this growing segment, diversifying beyond traditional milk products. The aim of the exhibition is to present the latest technologies of production in the livestock & Dairy sector by presenting production workshops, equipment, and products in one place.
